NOTES:

- The accuracy and content of this drawing are dependent on the original specification and EDI should be consulted before use of other details or use in CAD form.
- Where underground services are shown, all reasonable care has been taken within the scope of the original specification and equipment. Before use of this information the user should consult EDI on safety requirements of the completeness and accuracy of such details before undertaking any work. Due to the nature of this work and the restrictions imposed by ground conditions and the detection equipment no guarantee can be given that all services have been recorded.
- All reasonable care has been taken in the survey detail represented on this drawing but any discrepancies must be reported to EDI immediately. Our aim is to produce the best possible results within the specification and cost constraints of our clients. All comments are most welcome.
- All levels and coordinates are related to the datum described. Local names of walls are shown where known.
